

## NHS England Quality Accounts List 2021-22

The table below lists the National Clinical Audits, Clinical Outcome Review Programmes and other national quality improvement projects, which NHS England advises Trusts to prioritise for participation and inclusion in their Quality Accounts for 2021-22. Participation in NCAPOP and data entry should not impact on front line clinical covid care, the care of patients with covid should take priority during the pandemic. Further information is available at:

The legislation governing Quality Accounts is found in The Health Act (2009) and The National Health Service (Quality Accounts) Regulations (2010). These state that local healthcare providers must publish a “Quality Account” written document each year, which sets out information in relation to the quality of their services. The legislation does not impose any requirement on a healthcare service provider to participate in specific national clinical audits or enquiries, simply to report on whether or not they have participated in them, in the annual Quality Account written report. The legislation does not refer directly to the NHS England Quality Accounts List (The List) at any point.

The requirement to participate in the HQIP commissioned National Clinical Audit and Patient Outcome Programme (NCAPOP) projects stems from the NHS Standard Contract. The requirement to participate in national clinical audits and enquiries does not extend to non-NCAPOP projects unless commissioners have chosen to add a requirement to participate, by adding variations to the local contracts.

In addition, the NHS Standard Contract gives commissioners the power to impose penalties on healthcare service providers who fail to participate in an NCAPOP project. Project providers inform HQIP if a trust has failed to participate and the Care Quality Commission (CQC) may investigate this during a trust inspection and levy a fine.

For further information about the statutory function of this list, please refer to [HQIP’s Guidance on Quality Accounts](#).
